GICDMS

GREENATION INTERNATIONAL CONFERENCE ON DIGITAL MULTIDISCIPLINARY STUDY

"Anticipating the Global Economic Recession in 2023 and 2024 through the Agriculture, Forestry, Appropriate Technology and Digital Business Management Lectures"

July 28, 2023 - Bandung, Indonesia

ORGANIZE

BACKGROUND OF GICDMS 2023

The challenge of the free market within the framework of the ASEAN Economic Community (AEC) has been rolling in 2016, economic globalization, the era of digitalization 4.0, and society 5.0 in 2020, as well as the global economic recession which is predicted to hit the world in 2023 and 2024. From this issue all countries in the world will strive to improve their economic conditions, as well as compete to improve the quality of life from various aspects, be it the economy, human resources, and education. Competitive human resources are the basic capital to survive and develop in the current economic era. This is a big challenge for Indonesia to improve performance in the education sector in order to prepare quality human resources who are able to compete and excel. The quality expected is not only related to intellectuals, but also related to individual characters such as optimism for the future, hard work, and never give up. Of course superior human resources are needed in all fields, especially in agriculture, forest management, mastery of technology, and business management in an effort to anticipate the global economic recession in 2023 and 2024.

Because of this, high expertise and research activities from academia and practice are needed, both in quality and quantity as well as massive scientific publications, to provide input to the world as one of the solutions in anticipating the global recession in 2023 and 2024 as an anticipatory measure. In addition, currently the quality of tertiary institutions is determined, among other things, by the ability of lecturers to publish scientific articles in international journals indexed and recognized by the Ministry of Research, Technology and Education and Culture (Copernicus, DOAJ, EBSCO, WOS, and Scopus) in order to improve citations, h-index, sinta scores, and international rankings (Webometric, Unirank/4ICU, AD Science Index, etc.) for lecturers and campuses. This is in accordance with the demands for accreditation from LAM and BAN PT, so for this interest and urgency as a concern for the academic world, an International Conference is held called
